In Burkina Faso, the challenge of insecurity in a context of multifactorial crisis for Enfants du Monde

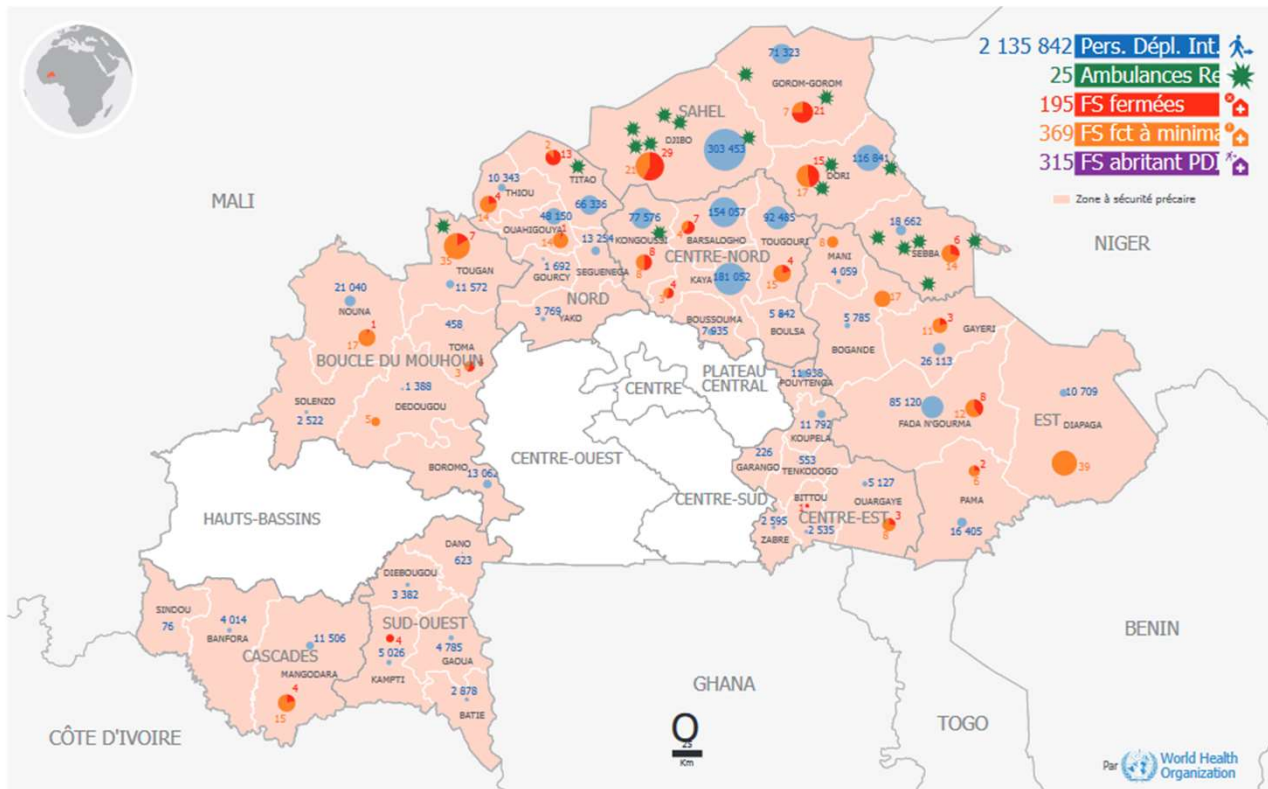

Thomas Rodrigues – MMS SYMPOSIUM – 2nd of November 2022

How we work in Burkina Faso

- 🌐 In a logic of development cooperation
- 🌐 In partnership with national NGO/institutions
- 🌐 By Supporting the Ministry of Health in the implementation of **health promotion actions** in the field of **maternal and neonatal health** and more recently **child health**:
 - Capacity building of health system actors
 - Community participation
 - Health education

The challenge of insecurity

Lessons learned

© adrien bitibaly

- 🌐 **Challenge:** to adapt our modes of intervention
- Think about better **complementarity between emergency and development**
 - Integrating the nexus in the design of any intervention in such context
 - strengthening the link between health care provision and health promotion and showing evidence of its positive impact on civilians
 - Enhancing the capacity of our local development partners to maintain a contact with isolated communities.
- Promote the recognition and development of **synergies between education and health sectors/actors**
- **Developing apps! New technologies are used in any context**
